The Brexit Dilemma: What would Britain’s exit from the EU meant for Singapore Businesses?

The European Union (EU) has been through several crises. While the Eurozone has shown its resilience, uncertainties have again arisen over Greece’s commitment to its reforms and whether there will be a Grexit – Greece exit from the Eurozone. Now speculation is also rife with regards to Britain’s future in the EU. Would there be a Brexit – Britain’s exit from the EU - if the Conservatives return to power and a referendum is held to decide on whether Britain should stay in the EU? Many pundits believed that a Brexit would be far more damaging to the EU than Grexit to the euro zone.

As Britain’s May 7 general election approaches, businesses are watching the developments closely. Would the election results translate to a Brexit? What changes can we expect from the Brexit and how will it impact the Singapore businesses? These will be discussed at the panel discussion.

Who Should Attend?
1. Companies who are keen to receive first-hand updates and insights on the developments in Britain and Europe from eminent speakers.
2. Companies who are doing business or are interested to do business with the EU member states.
3. Companies who wish to network with like-minded business counterparts at the event.
